

# SAP Lumira, Edge Edition

## Data Discovery and Visualization for Teams and Departments

SAP Lumira, Edge edition is a software solution that quickly helps teams and departments to better understand data and use it to tell stories that captivate audiences.

Running on standard hardware, the solution includes an in-memory engine that speeds up discovery of hidden patterns and outliers using beautiful visualizations and infographics that can be shared throughout the organization.

### Key Functions and Features

- Data discovery using interactive visualizations and charts to convey qualitative and quantitative knowledge
- Access data mashups and content created with SAP Lumira, desktop
- Create data stories with boards, infographics or custom charts that draw the audience's attention
- Collaboration by viewing, editing, and sharing content in a web browser or mobile device (native app)
- Secure portal – Secure access to content for authorized decision makers

### Typical Customer Challenges

- Running business with spreadsheets only
- Lack of timely visibility into key business metrics
- No access to corporate BI tools
- Need to combine disparate data sources to combine granular details with the big picture
- IT involved in creating predefined query or report every time a new question arises
- Inflexible reporting tool with no data interactivity or refresh

### Customer Business Value

- Faster time to insight – Deliver self-service data discovery on any data
- Improved information quality for decision making with engaging visualizations and infographics
- Increased number of employees analyzing and leveraging existing data assets
- No dependency on IT resources and specialized analysts - Perform data analysis without the need for IT to create queries, reports or dashboards
- IT approved solution – Quick install, small footprint and simple to manage
- Improved information security by controlling access and viewing rights to make sure the right people have the right access

### Ideal for

- Small and medium enterprises
- Teams and departments within large enterprises
- All industries

### Line-of-Business Beneficiaries

- Lines of Business Executives
- Business Analysts
- Chief Financial Officer
- Chief Operating Officer
- IT Executives

### Why SAP?

- Only SAP can deliver a data visualization experience for one individual, the department or the entire organization on a single platform without adding to your IT department workload
- A low-TCO, Windows-based option for departments and lines of business
- Both standalone and trusted data discovery scenarios available
- Connect to SAP BI platform later to get the advantages of a true data discovery solution for your department or the entire organization
- SAP is the Analytics market leader
